

Part1-Travel Consulting Company

- Assumptions
- Each team handles one region at a time. A region may have zero or more teams.
 - A consultant can work on more than one team, e.g. to cover sickness or staff shortages.
 - Each call is taken by one consultant and is from one customer.
 - callType is either "New Travel Need" or "Existing Reservation".
 - Monthly call statistics are calculated from callDate, callType, and duration.
 - 1 / N = maximum; circle = zero, bar = one.

Part2-DVD Rental Company

- Assumptions-
- Each staff member works at one branch at a time. Each branch has one manager, and a staff member manages at most one branch.
 - A member can register at more than one branch; registration stores the date for each branch.
 - dailyRentalCost is the same for every copy of a movie at a branch, so it is stored in branch_movie.
 - Each DVD copy is one movie at one branch; (branchNo, imdbCode) in dvd references branch_movie.
 - Member name, DVD title, and daily cost of a rental are found through foreign keys, not stored again in rental.
 - A member can have at most 10 DVDs rented at one time; this rule is enforced by the application.
 - 1 / N = maximum; circle = zero, bar = one.
